

WE CAN ALL CONTRIBUTE

The OpenCovid19 Initiative seeks to bring together individuals and groups from a variety of backgrounds and fields to create the solutions we need to address the COVID-19 pandemic and develop a comprehensive and open collection of these solutions and research.

- More information on the [Opencovid19 initiative program page](#) on JOGL -

Who is it for?

Everyone. So far, more than 2000 contributors have joined from all continents and are working on open source and low-cost solutions such as masks, ventilators, diagnostic tests, and apps helping users to adopt the right reflexes.

How to contribute?

1. Join the Opencovid19 community by [creating a profile on JOGL](#) and join the [Slack workgroup](#)
2. Follow the [onboarding process](#)
3. Join groups and projects of your interest on Slack, chat with people, and create your own project on JOGL if you'd like
4. If you have any question, you can write to opencovid19@jogl.io or camille@jogl.io / thomas@jogl.io / katherineh245@gmail.com

Feel free to join us during our **general community call every Wednesday at 6 PM (Paris time)** [online here](#)

A word about JOGL:

[Just One Giant Lab \(JOGL\)](#), a non-profit organization based in Paris, aims to accelerate, at an international level, the solution of the most important challenges of our time by offering an open alternative to the academic research model. Through its contributory and inclusive approach and decentralized mobilization platform, JOGL aims to increase tenfold the number of contributors to the creation of open knowledge and solutions. By partnering with university laboratories, companies, foundations, NGOs and public services to create open and participatory research programs, JOGL catalyzes the creation of concrete solutions to humanity's environmental, health and social problems.
